特別価格 ¥41,140 (税込)

Armed Conflict and International Law in the Indo-Pacific Region provides a timely and regionally grounded analysis of how international law applies to potential armed conflict in one of the world's most strategically dynamic regions. Adopting a multi-domain approach, the volume explores the legal frameworks governing warfare across land, sea, air, space, cyber, and the information environment, while remaining attuned to the Indo-Pacific's evolving geopolitical landscape.

特別価格 ¥49,656 (税込)

This book tackles the enduring puzzle of consent-based use of force in international law. Why can force be justified by state consent, and under what conditions is such justification valid? These questions have long been treated separately. This study brings them together through a new theoretical framework that connects theory and practice. Drawing on the humanisation of international law, it reconstructs the principle of non-use of force by integrating a human-centred perspective into the traditional state-to-state model. By doing so, it offers a coherent account of consent-based force and redefines the role of human interests within a fundamentally state-centric legal order.

国際海峡：学際的アプローチ

(International Straits of the World, Vol. 20)

Brill/Nijhoff

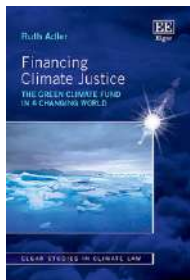

9789004721395 2026.4 429 pp. Hard

特別価格 ¥64,370 (税込)

Around 90% of international trade (in terms of tonnage) is carried out by sea, and these flows use the many natural or man-made straits (maritime and transoceanic canals). As both transverse and longitudinal passageways, straits play a fundamental role in maritime relations. This book takes a multidisciplinary and international approach to the Straits: legal, geographical, historical, environmental, economic and geopolitical. It examines their functions and the issues associated with them, both now and in the past, using specific examples: Artics, Dover, Gibraltar, Hormuz, Kerch, Malacca, Messina, Oresund, etc.

特別価格 ¥72,948 (税込)

This timely Companion explores the opportunities and challenges of ocean governance within the context of the 2030 Agenda for Sustainable Development. Experts from around the world investigate pathways to attaining the Sustainable Development Goals (SDGs) for the ocean, specifically SDG 14 which recognises the importance of a healthy ocean for our planet's future.

(Essential Air and Space Law, Vol. 31)

Brill/Nijhoff

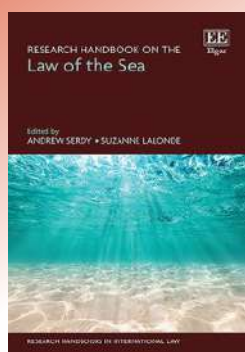

9789004766600 2026. 11 600 pp. Hard

特別価格 ¥72,252 (税込)

Step into the rapidly changing world of aviation, where drones are redefining how we use the skies. In Drone Law and Policy, you explore the key legal questions shaping this technological revolution: How can unmanned aircraft safely share airspace with traditional aviation? What rules govern commercial, recreational, and government drone use? How do privacy, security, liability, and international law adapt to autonomous flight? Through clear analysis and vivid examples--from early military experiments to modern air-taxi concepts--you discover how law struggles to keep pace with innovation. Drawing on rare historical insights, evolving EU and U.S. regulations, and emerging U-space systems, this book offers a unique bridge between aviation law theory and real-world practice. If you want to understand the legal future of drones, this book is your essential guide.
