This book considers the complex and contradictory role of the United Nations when it comes to human rights around the world. It depicts the United Nations as a global arena in which state and non-state actors continuously contest issues around human rights. This ongoing contestation simultaneously produces both advances and setbacks when it comes to the rights of stateless populations, women, Indigenous peoples, and racialized people, as well as rights related to health and the environment.

This book analyses humanitarian-intervention's evolution from the nineteenth century through to the contemporary Russia-Ukraine War to determine whether a right to humanitarian-intervention exists under customary international law. It concludes that any such right has since been extinguished under international law.
